

HOW TO CREATE A PRINT-READY FILE:

COUNTER WITH HEADER

The following instructions are designed to help you create a print-ready file. If after reading them you are still unsure about anything, please download the template, visit the FAQ section of our website, request a professional File Check or contact customer support.

1 FILE FORMAT

Send your file in PDF format (not password protected).

2 TEMPLATE

Download the template for your chosen product from the website and use it as the basis for your work: you will find the dimensions you gave when ordering, the bleed and other guidelines already correctly set up. Insert your artwork, delete all guidelines except the green lines and save the file as a high-quality PDF without crop marks.

GOOD TO KNOW - Counter with Header

3 COLOURS

All files should be sent in **CMYK** (cyan, magenta, yellow, black) format with the **Fogra 39 colour profile**. Images in RGB or with PANTONE colours will be converted automatically using a standard colour separation profile. The same colour may vary slightly in appearance depending on the media onto which it is printed, as a result of the material's physical composition.

4 RESOLUTION

The optimal resolution for the print files is **between 100 and 150 ppi**.

5 ADDITIONAL INFORMATION

The minimum line width is 0.5 pt. **We do not advise placing frames too close to the edges**, to avoid any inaccuracy due to the cutting tolerances.

GOOD TO KNOW - specific information

Warning: Do not place important graphics outside the safe area, otherwise the artwork may be covered by the frame of the counter.
