

## HOW TO CREATE A PRINT-READY FILE:

### PLASTIC MAILING ENVELOPES WITH FLEXOGRAPHIC PRINTING

The following instructions are designed to help you create a print-ready file. If after reading them you are still unsure about anything, please download the template, visit the FAQ section of our website, request a professional File Check or contact customer support.

This product allows you to print your artwork in a **single colour on one or both sides** within a predefined area. **Various formats** are available, with the print area varying accordingly.

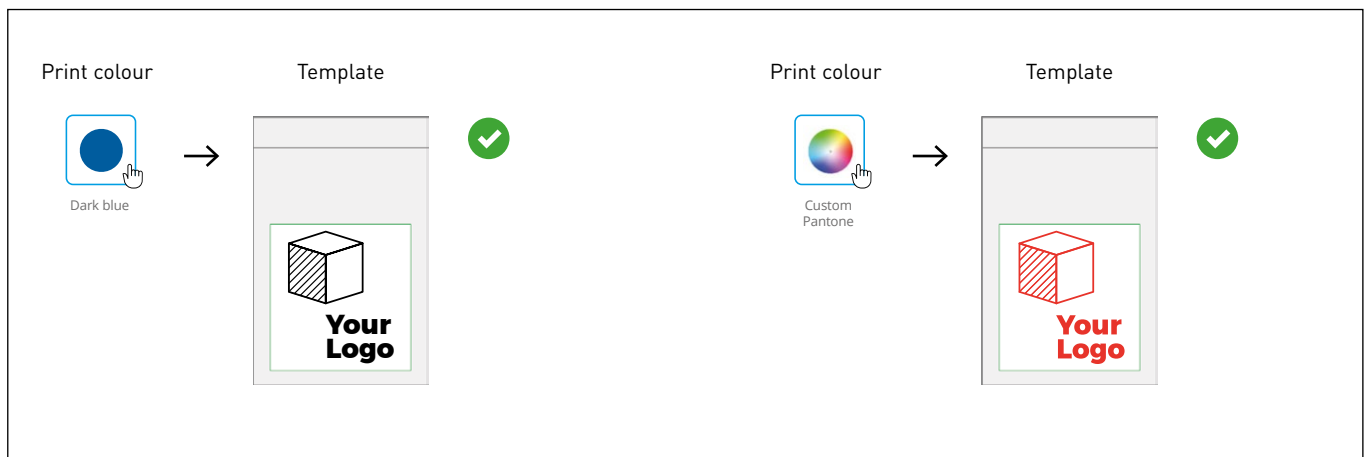

#### 1 FILE FORMAT

Our systems can only process files in **PDF format and in 1:1 scale** (not password-protected).

#### 2 COLOURS

If you have chosen one of the predefined Pantone® print colours listed on the order page, give your artwork a pure black colour (K 100% only) and use the **CMYK** (cyan, magenta, yellow, black) colour mode with the **Fogra 39 colour profile**.

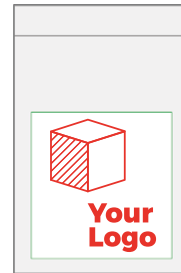

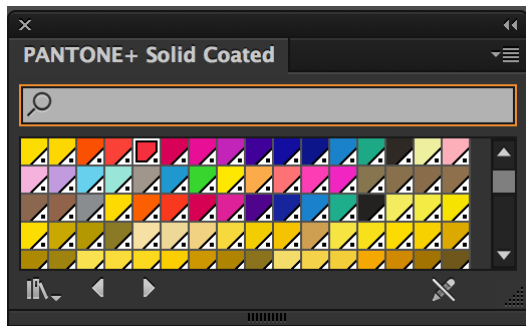

If, however, you have chosen a custom Pantone® colour, please indicate your preferred Pantone® colour swatch in the print file. You can choose any colour from the PANTONE® + Solid Coated series.

## CUSTOM PRINT COLOUR

Window > Swatch Libraries > Color Books > PANTONE + Solid Coated

Select your chosen Pantone® colour and assign it to the graphics

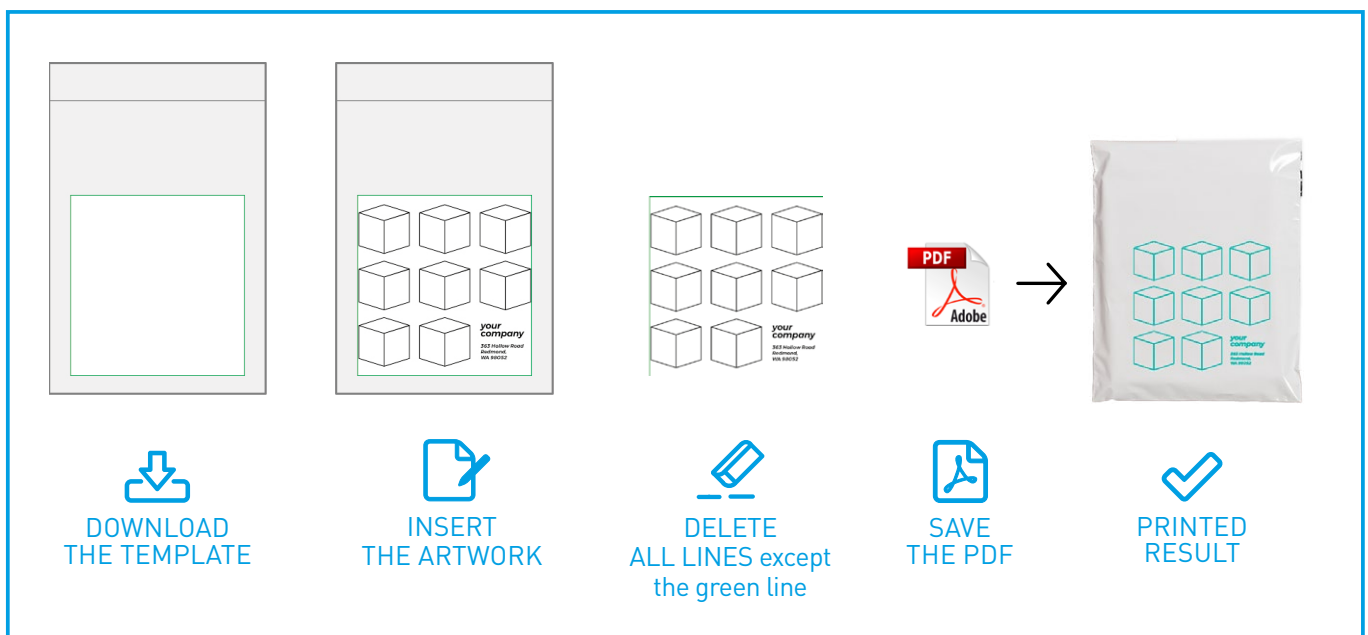

## 3 TEMPLATE

Always download **the template** for the product you purchased from the website and use it as the basis for positioning your artwork: this will make it easier to create a print-ready file.

Insert your artwork on the 'Artwork' layer, inside the pre-defined space on the artboard. Then delete all the guidelines except the bleed line (the green line) and save the file as a PDF.

Do not alter the scale of the design or resize the template.

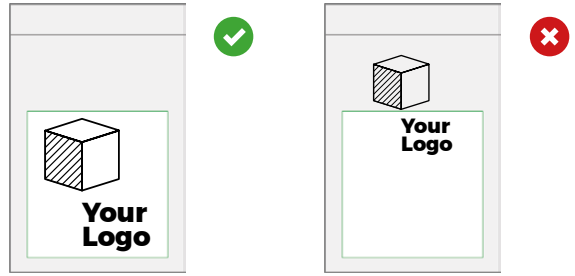

## 4 ADDITIONAL INFORMATION

The graphics **must not contain gradients**, reticulation or transparencies and **must be in vector format, in solid black (K100% only) or with the corresponding predefined PANTONE® colour swatch.**

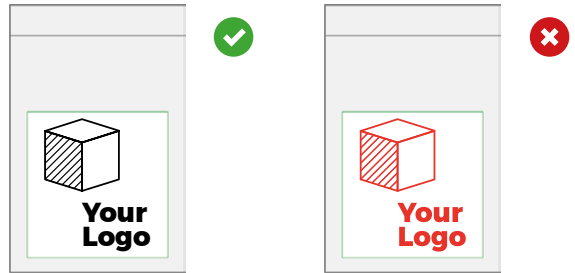

Minimum font size: **20 pt**, minimum line weight: **2 pt**.

## GOOD TO KNOW - Plastic Mailing Bags

 Insert the artwork in the predefined area of the template.

 Create vector graphics in solid black (K 100% only).

 Do not add gradients.

 Minimum font size: 20 pt.  
Minimum printable line weight: 2 pt.

 Fonts and lines needs to be thicker for negative designs than they are in positive designs, with a minimum printable line weight of 4 pt.
